## Events

Our experienced engineers provide optimal solutions for any event, including fairs, trade shows and exhibitions, concerts, festivals and film & TV locations. The KES Distribution units are designed to meet customers' exact requirements, with a wide variety of options available including metering, castor wheels, protection and H07 extension leads or tails.

Arctic grade cables can be security printed with company details, telephone number and serial number if required.

## Ischl Distro New From PCE

The new Ischl series of thermoplastic insulated distribution boxes allow more sockets and protection on a mobile unit. Available in three different configurations, all with 2 metres of H07 cable to plug for incoming and 9 sockets outgoing, ranging from 13a to 32a, 230v to 400v. They are also stackable enabling a bank of sockets to be easily set up.

This range has been expanded by PCE to include 2 extra sockets along with the ability to add protection. Available in three different configurations the St. Anton allows quick and easy power distribution wherever it may be needed.

## Festoon Lighting

Our bespoke festoon can be made in various spacings and lengths to meet requirements. Plugs and connectors can be added in a variety of ampages to allow links to be joined together making festoon an easy and cost effective way to get light to the places you need.

## Midnight Range

An ever increasing range of products available in the black midnight range allowing plugs and connectors to seamlessly fit into any environment. Always popular in the events sector for their ability to blend in.

# PCE Grip Plug and Connector

The new CEE plugs and connectors with rubberized surfaces provide more safety and a perfect grip for all environments and applications.

Available in 5 pin, 16a and 32a from 110v to 400v. We will be offering the standard screw terminal, turbo terminal screwless connection and the all black midnight range, which is ever popular in the event environment.

KES was formed in the mid-seventies by Mr Derek Karl and traded as Karl Electrical Supplies from offices in South East London. In the late seventies the company expanded and opened a corner shop in Southampton where it traded for several years until moving to our current location. Further expansion took place in 1994 with the opening of a branch in Yorkshire.
