

# Project portfolio

Take a look through this catalogue for some examples our bespoke project work.

Our extensive manufacturing facilities are equipped with state of the art equipment and CNC machines.

In addition to sheet metal works, we also have access to a modern powder coating plant to give products the most durable finish to withstand the harshest of environments, and to allow customers to specify colours to suit their requirements. All products are fully assembled and tested by a team of highly trained and experienced electrical fitters.

We are a leading innovative force in the electrical switchgear industry, with a reputation for delivering flexible and economic solutions to the most challenging of problems, within a timely manor. Working on bespoke projects our design team take your initial concept and compile a comprehensive package tailored to suit your specific requirements.
